SUMMARY

Software Engineer (Full Stack) with 4+ years of experience building scalable, secure, production-grade web applications. Strong expertise in MERN stack, backend system design, real-time systems, and security-first architectures. Proven ability to own features end-to-end from system design and development through deployment.

TECHNICAL SKILLS

Languages & Frontend: JavaScript (ES6+), React, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express, REST APIs

Databases: MongoDB, PostgreSQL, MS SQL Server

Cloud & DevOps: AWS (IAM, S3, CloudWatch, KMS, Rekognition), Docker

Tools & Practices: Git, Postman, CI/CD workflows, secure coding, input sanitization, production monitoring

PROFESSIONAL EXPERIENCE

Tecogis — Full Stack Developer

Jan 2024 — Present

- Built a Vendor Accreditation & Access Control system with Aadhaar and face verification, role-based access control (RBAC), and VPAT-aligned compliance for enterprise security and accessibility standards.
- Designed secure backend architecture with token-based authentication, session management, audit logging, and granular permission models supporting multiple user roles and workflows.
- Developed real-time applications supporting live gameplay, QR-based interactions, analytics, and system monitoring for reliable, high-concurrency user flows.
- Followed industry-standard development practices including secure coding, input sanitization, CI/CD workflows, version control, and production monitoring.

Uniton India — Founder & Full Stack Developer

Jun 2020 — Feb 2023

- Founded and built a full-scale MERN-based e-commerce platform with secure authentication, product categorization, filtering, and responsive dashboards.
- Designed and implemented RESTful backend APIs using Node.js, Express, MongoDB, and JWT authentication.
- Managed inventory, orders, and end-to-end production workflows ensuring system reliability and maintainability.
- Owned product development end-to-end, including system architecture, development, deployment, and iterative improvements.

EDUCATION

MGV's Loknete Vyankatrao Hire Arts, Science & Commerce College | 2015
HSC — Computer Science

K. K. Wagh Institute of Engineering Education and Research
Bachelor of Engineering (Incomplete) | 2016–2017

ACHIEVEMENTS

Top 11 finalist — Techfest IIT Bombay (Robowars), 2018
